

# Overview of documents on examination

---

<b>general</b>	
	<p>All documents are placed in the Process Architecture Examination.</p> <p>The Process Architecture Examination is the main framework we use to set up a management quality system. It is a schematic clear overview of the examination process. It is divided in process areas and processes. The arrows point at the right sequence of the processes.</p> <p>All actions a school must take to make sure that the examination process is of high quality are explained. The process architecture has six process areas:</p> <p>Establish framework – Learning (in preparation of examination) – Creating and Determining – Examination – Qualification – Quality management of process areas, processes and team expertise. And the process areas are divided in smaller processes like the draft of an exam plan, the purchase or construct of exams and assess.</p> <p>The architecture helps to get into control of the examination and work towards a system of continuous improvement of processes. All the frameworks, documents and readers we made, translated and discussed are linked to the Process architecture examination.</p>

Document name:	<b>DOC.Field2.pdf</b>
Introduction:	Framework for the quality of examination and certification.
Usability:	It can be used to judge the quality of examination and certification.

Document name:	<b>Doc.10 Process architecture of examination PDF</b>
Introduction:	The Process Architecture Examination is the main framework we use to set up a management quality system. It is a schematic clear overview of the examination process. It is divided in process areas and processes. The arrows point at the right sequence of the processes.
